

# Using Entrapass Go App

With your Kantech Door Access Control system, access is also granted to Operators to use the Entrapass Go App which allows you to control your Door Access Control System. This guide covers the setup of the Entrapass Go app, as well as basic navigation. To start:

- Install the Entrapass Go App. You should have received an invitation via email on the creation of your Operator account, if not you can search IOS App store or Google Play Store to find and install the app
- Upon opening the app, you will be prompted to create a gesture:

- After saving your gesture you will be prompted by your device to enter your device's security, which will be typically either a fingerprint or device code

- You will be prompted to log in. The following details will be required:  
Server Name: **Whatever you choose to be (Organization name is recommended)**  
Server URL: **doors.cascloud.org**  
Service: **SmartService (Should be auto filled)**  
Username: **Provided by Crime Alert or your Administrator**  
Password: **Provided by Crime Alert or your Administrator**

Demo

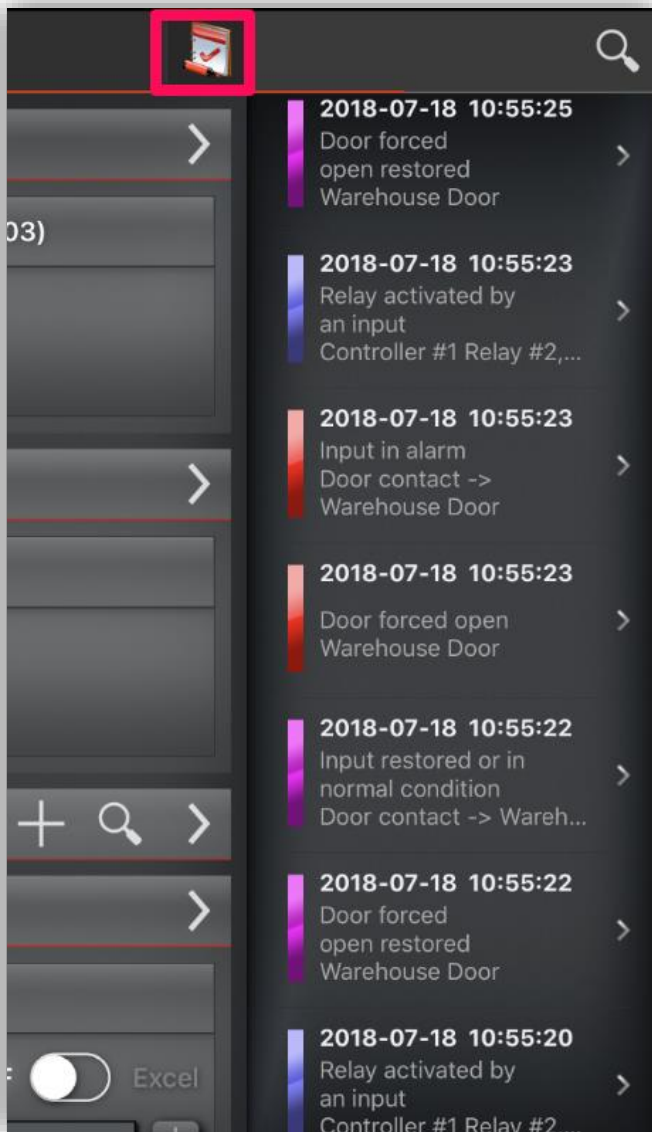

- Upon logging in you will be taken to the Homepage. This will have quick options Doors, Intrusion, Users, Reports. Also, in the top right is the Menu Icon and Events Icon:

- Upon Selecting Menu, it will bring up the following options, and each option directs you to the items page:

- Upon Selecting the Events icon, an Event log will show up on the left side. **Note**, this will show any new event logged, not any past events:

- If you need further assistance setting up or using the Entrapass Go app, contact the Crime Alert Security Office (916-489-8068).
